Step 2: Click on the 'POPULATE CALENDARS' button to have the dates marked above automatically filled in by the calendar tool.

POPULATE CALENDARS   RESET

119.00   Total Days of Parenting Time for Parent B (Non-custodial) Over 24 months

59.50   TWO-YEAR AVERAGE of Parent B's number of parenting days per year (half the number above)

16.30   % PT for the Noncustodial Parent

Step 3: You may manually adjust the calendar below as needed & the day total will update.

Step 4: Create a worksheet at https://csconlinecalc.georgiacourts.gov/frontend/web/index.php . Then, enter data from Line 5 of the CSW below and click "Apply Formula" button.

[   ] Custodial Line 5

[   ] Non-Cust Line 5

Apply Formula

[   ] Parenting Time Adjustment/ Deviation Amount*

*Generally, to be deducted from the noncustodial parent's obligation, by using the Parenting Time Deviation as found on Schedule E of the Child Support Calculator

Step 4: Save/Print your work

Export/Print to PDF   (Select 'Save as PDF' in the printer options)

Notes:

To create a "50/50" alternating weeks schedule, set the Beginning and Ending as the same day of the week in the Regular Weekly Schedule.

The text of any court order takes precidence over this calendar even if this calendar is attached as an exhibit. The calendar is a visualization aid and is non-binding.

Dates of breaks may vary by school. All default dates are calculated by a computer formula and may not reflect actual break periods for any particular school. They are approximate dates only and based on some historical Gwinnett County school calendars.

This tool does not account for alternating 5th weekends. Those must be added by you manually by typing a "1" on appropriate date on the calendar below.

Because exact summer vacation dates are often undetermined until closer to summer, this tool assigns June weeks to Parent B and July weeks to Parent A. Selecting the option "Parent B only from the first Saturday after school is released until the last Sunday before school resumes." will block out only 8 weeks. You will need to manually add additional days based on your child's school calendar.

This tool gives the Summer Schedule priority over the Holiday Schedule. This may impact Father's Day and July 4th if your case's Parenting Plan sets a different priority order. Adjust the numbers manually as necessary.

The formula for the final PT adjustment is $((CB^{2.5}-DA^{2.5})/(B^{2.5}+A^{2.5}))+D$; Where: A=Custodial Days, B=Noncustodial Days, C=Custodial Line 5 from CSW and, D=Noncustodial Line 5 from CSW.

Fractional days may show up in the calendar as a decimal rounded to the nearest tenth of an hour. However, on the software's back-end, that number is not rounded. This eliminates rounding error when all the values are summed in Step 3.
